Principauté de Monaco

**Net Asset Value publication mode**

Published in the "Journal de Monaco" and displayed at CMB Monaco headquarters and in CMB Monaco branches. Our funds' net asset values are regularly published and updated on the website [www.cmb.mc](http://www.cmb.mc)

## INVESTMENT UNIVERSE AND PHILOSOPHY

The fund MONACO PATRIMOINE SECURITE EURO invests mainly in equity, bond and alternative funds with an equity exposition between 15% and 35% of the total fund.

The management is discretionary and prioritises asset class allocation with a strong diversification across sectors and geographies as well as in terms of the number of positions.

## RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

## PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

CUMULATIVE PERFORMANCE	1 month	1 year	3 years	3y (ann.)	5 years	5y (ann.)

## FUND MANAGEMENT COMPANY

CMG Monaco SAM  
23, avenue de la Costa  
Principauté de Monaco

## FUND MANAGER

## SUSTAINABILITY RATING

The rating is expressed as 1 to 5 “globes,” whereby a higher number of globes indicates that the portfolio has lower ESG Risk. The number of globes a fund receives is determined relative to other funds in the same Morningstar Global Category.

## MANAGEMENT COMMENT

Global equity markets ended August down across the board. In the U.S., the Nasdaq lost -2.2% and the S&P 500 -1.8%. Japanese equities fell -1.7% (Nikkei 225), China -6.2% (CSI 300) and emerging equities -6.4% (MSCI Emerging). Europe (Eurostoxx 50) is down -3.9%. On the fixed-income side, risk premiums in the Investment Grade category rose slightly from 68bp to 70bp (Itraxx 5 years). Finally, risk-free rates were down slightly (German 10-years fell from 2.49% to 2.47%).

The Chinese economy is showing signs of weakness in services, manufacturing and real estate. Measures have been taken to boost activity, and more are expected. This is partly affecting Europe, which is facing headwinds and is also experiencing a slowdown. The USA and Japan, on the other hand, are experiencing economic resilience, and the latest indicators are in the green.

Inflation is falling slowly in Europe, reinforcing the idea of higher rates to combat it. In the US, the healthy state of the economy suggests that rates are likely to remain high for longer than expected. High rates limit future growth and therefore impact global activity in all zones. The key for the markets therefore lies in lowering them. The continued fall in inflation should eventually bring about a change in the rhetoric of the central banks (ECB and Fed), which will be positive for risky assets.
