QUARTERLY MANAGEMENT COMMENT

Emerging Markets were up by 2.5% in March, as economic surprises turned more positive globally. Among the large markets, Taiwan led the way with Taiwan Semiconductor, the largest position in the index, progressing by 12%. The Master fund lagged over the month, up 1.3% and in-line with the benchmark since the beginning of the year, as Growth stocks dominated the upside in March.

The strong performance of the index heavyweights weighed on performance, South Korea as a country detracting the most relative performance with Samsung Electronics up more than 11% on the month. Good selection of stocks in Brazil and Malaysia contributed positively to the fund's relative returns, as well as the underweight position on Saudi Arabia.

The allocation to China was reduced last month, the fund being now underweight in the country, the largest strategy exposure there being on Communication Services stocks, Financials being the most underweight. The underweight India was slightly reduced. Malaysia is our top overweight, including names with very attractive fundamentals' momentum locally in the financial and industrial sectors.
