The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

## MANAGEMENT COMMENT

The German 2-year sovereign yield fell to +2.53%, after -0.30% over the month. The European Central Bank left its monetary policy unchanged at its meeting on 18 July. The idea of a less restrictive policy has taken hold in the markets, even though inflation in the eurozone accelerated unexpectedly in July. The ECB is keeping a close eye on the resilience of services prices. Macro indicators are mixed, although activity and the business climate are holding up well. In France, growth came in better than expected, but political risk has increased. The fund's carry remains attractive, combined with a high duration. The portfolio average rating is BBB.
