RISK PROFILE

Risk/lower potential reward

Risk/higher potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE SHARE CLASS R

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

FUND MANAGER'S COMMENT

Interest rates continued to fall in July, with the German 10-year rate falling from 2.50% to 2.30%. Spreads against the swap curve continued to tighten, reaching 75bp and approaching the lowest levels seen in April (72bp).

July began with a lull in political risk in France. As expected, the ECB kept rates unchanged at its meeting on 18 July, and Mrs Lagarde was conciliatory about the months ahead. Generally speaking, the actions of central banks remain a subject of concern for investors, as are economic data and even more so than upcoming political deadlines, particularly in the United States. Earnings reports have been better in the US than in Europe, where a number of warnings have been issued in the luxury goods, transport, IT services and automotive sectors. The credit market remains resilient, however, thanks in part to the fall in activity on the primary market.

On the primary market, we participated in new issues by Crédit Agricole (Social Bond) and Monte Paschi di Siena (Covered Social).
