MANAGEMENT COMMENT

The 2-year US Treasury fell by 34bps to finish at +3.916%. The markets are 100% expecting the Fed to cut rates for the first time on 18 September. The beginning of the month was marked by a spike in volatility (VIX at 38) on the integration of a recessionary risk following mixed macro indicators. The markets have since rebounded. Overall, corporate profitability remains high, but the unemployment rate is rising. As for inflation, the levels and downward trend suggest that the FED and ECB central banks are likely to ease financial conditions in the near future. The fund has benefited from these expectations of rate cuts. The fund's weighting remains attractive, combined with a high duration. On the credit side, the average rating of securities is BBB, with a low proportion of high-yield debt.
