Principauté de Monaco

NET Asset Value publication mode

Published in the "Journal de Monaco" and displayed at CMB Monaco headquarters and in CMB Monaco branches. Our funds' net asset values are regularly published and updated on the website www.cmb.mc

INVESTMENT UNIVERSE AND PHILOSOPHY

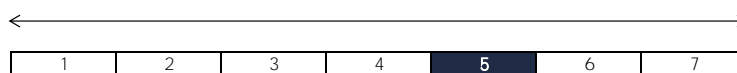

The fund **MONACTION HIGH DIVIDEND YIELD** invests in international equities from developed countries which offer a large dividend.

The fund is hedged against FX risks and the management is discretionary and conviction based with a selection process that starts from a macroeconomic analysis and finishes with the stock choices (Top-Down). The fund is diversified across sectors and geographies.

RISK PROFILE

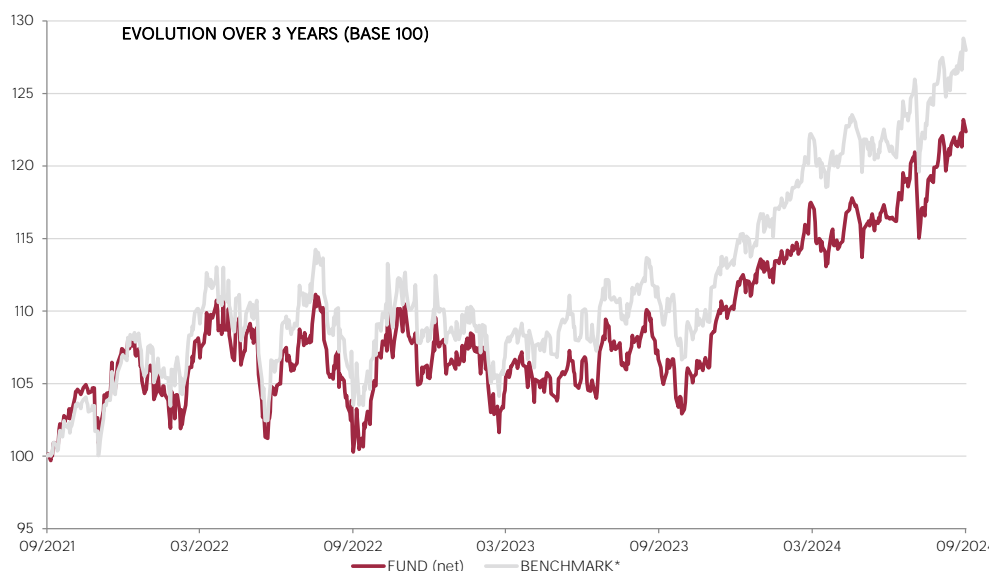

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT

In September, markets benefited from the impetus provided by accommodative central banks such as the FED in the USA, which cut rates by 0.5%, and in China the launch of monetary stimulus measures by the PBoC coupled with fiscal stimulus by the Politburo to combat weak economic growth.

Investors enthusiastically welcomed the start of a synchronized global rate-cutting cycle. The Hang Seng rose by nearly 17.5% and the Chinese CSI 300 index closed up 21%. The US stock market (S&P500 +2%) and the European stock market (due to its large exposure to the Chinese economy) also benefited from this news, thanks in particular to the luxury goods and automaker sectors, which were the hardest hit by the slowdown in the Chinese economy and the worst performers since the start of the year. Unsurprisingly, the CAC40 was one of Europe's best performing indices in the last week of the month, thanks to luxury goods stocks such as Hermes, LVMH and Kering, which enabled it to make up some of the ground lost relative to other European indices due to the political instability that reigned in France throughout the summer.

The fund's performance was underpinned by cyclical companies that were previously impacted by the slowdown, but whose activities should now be boosted by lower interest rates (Rio Tinto in Commodities) and by companies with exposure to China (elevator manufacturer Kone, for example). The defensive Healthcare sector was the weakest performer over the period, failing to benefit from any of the current catalysts.
