### Performance (basis EUR) - Evolution over 5 years (base 100)

Source: Bloomberg. Period from 28/02/2020 to 28/02/2025

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

Cumulated performances	1 month	1 year	3 years	3 y (ann.)	5 years	5 y (ann.)
Fund	0,84	3,99	-1,79	-0,6	-11,43	-2,4

Annual performance	2025	2024	2023	2022	2021
Fund	2,73	0,24	8,34	-17,17	-7,44

### Manager Comments

The contribution from the overlay positions was slightly positive to performance in the quarter. The underweight developed markets duration was contributed to performance, and a small cash position also additive. This was offset by a basket of currencies we held in the overlay sleeve as well as a CDX EM hedge we continue to hold. The overweight allocation to local currency vs hard currency was positive as local currency markets outperformed in the quarter.

In the corporate space country allocation contributed to performance while security selection detracted slightly. The primary driver of positive performance came from the overweight to Argentina where ongoing reforms continue to support improving fundamentals.

Emerging market debt stands to benefit from slower but not recessionary U S growth, lower global yields, and a wider growth advantage for emerging versus developed countries. The asset class has tended to perform well after Fed hiking cycles. Should investor sentiment improve, an acceleration in flows could be a tailwind for EMD.

ESG risk: Although the portfolio manager intends to implement the ESG investment process as described in the Mediobanca Group sustainability policy (<https://www.mediobanca.com/en/sustainability/esg-and-the-focus-on-consumers/esg-in-our-group.html>) and on the CMB Monaco website (<https://www.cmb.mc/sites/default/files/2022-05/CMG%20MONACO%20ESG%20POLICY.pdf>), the success of the ESG strategy largely depends on third-party data providers as well as their methodologies and IT systems. These data are not systematically tested or verified by the manager. Consequently, the manager may invest in or divest from a security based on information provided by a third party that may later prove to be inconsistent with the fund's criteria. This could occur when the provider considers additional information that causes the investment to no longer meet the investment criteria. Moreover, multiple providers may be used; however, different providers may present differences, discrepancies, or inconsistencies regarding information related to certain companies. Therefore, in some cases, an internal assessment is conducted to evaluate the company's involvement in a certain activity or controversy. In these cases, the manager does not guarantee that the internal evaluations meet investors' expectations regarding investment or divestment according to the ESG investment process.

\* The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

\*\* The rating is expressed as 1 to 5 "globes," whereby a higher number of globes indicates that the portfolio has lower ESG Risk. The number of globes a fund receives is determined relative to other funds in the same Morningstar Global Category.
